COMMENTS

Annual Conference:

"Just wanted to say that I have not been a member of CalGEO in the past, but after this conference, I will be happy to follow you. It was very well done!! I'm so impressed at how you put that together and pulled it off. The software that ran it was very friendly and sharp. And the speakers were a good lineup. Congratulations on your big success bringing GEs together!!!"

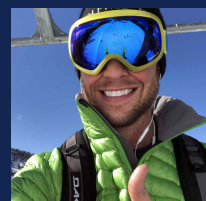

- Emil Rudolph, Atlas Technical Consultants

Write Right Web Series:

*"I can't say enough good things about this writing seminar! I thoroughly enjoyed each of John's presentations. His presentation style was entertaining and engaging, and there was just a wealth of high-quality content at every turn of the slides. **What a fantastic investment!** Thanks for putting this together."*

- Byron Foster, Keller NA

*"I attended your Write Right webinar through CalGeo. **The webinar was the most helpful one I've attended so far in my career,** and it was as entertaining as it was helpful. Thank you for pushing me and my fellow geoprofessionals to elevate our writing and our profession."*

- Phillip Madrid, Earth Systems

CalGeo Organization:

"I just wanted to thank you for organizing all these events through CalGeo. I have to recognize that since you became involved with CalGeo you have brought new energy and a wave of new ideas to the organization, and you have created something that we geotechnical engineers and geologists can be proud of. Thank you for all that you do and the great work you are doing and please continue to help us and provide us with more opportunities to grow and learn."

- Fernando Cuenca, Tetra Tech

AWARDS Outstanding Project Award Winners

Highland Hospital: Langan Engineering

Public Large Budget Category

Claire Lilienthal Elementary School Ground Improvements: ENGEO

GOALS FOR THE FUTURE

CalGeo's goal is to unify, strength and advance California's geotechnical industry.

1

Bring back our in-person events!

We can't wait to see all your lovely faces again and hope to hold regional dinner meetings again in the fall along with our two golf tournaments in October. We are also planning to bring our **Annual Conference** back to the Resort at Squaw Creek for April 2022!

2

Revise our RGE study materials

Over the past year we have re-typed and organized the written study materials we provide for the California Registered Geotechnical Engineering exam. We plan to redo all the video lectures in the next 18-months to provide a valuable resource to incoming young professionals.

3

Expand our Online Learning Library

CalGeo will continue with our virtual learning opportunities through our free Emerging Professional webinars and valuable short courses. We connect you with the industry specialists to provide training for you and your staff. Almost all our webinars and courses are recorded and available through our Online Learning Library to CalGeo members.
